CAREER SUMMARY

Highly motivated and detail-oriented Full Stack Developer with over a year of professional experience in designing and developing scalable web and mobile applications. Proficient in JavaScript, React.js, Node.js, and React Native, with expertise in building RESTful APIs, intuitive user interfaces, and real-time features. Adept at creating optimized, reusable components and delivering high-quality solutions that enhance user experience and productivity. Successfully executed multiple personal projects, including InsecView, a Next.js-based web app, Shopease, an e-commerce web app, and Gaao, a karaoke mobile app. Passionate about solving complex problems, mastering cutting-edge technologies, and contributing to innovative projects.

SKILLS

- JavaScript, Python, React.js, Next.js, Tailwind, Node.js, Express.js, Vercel, REST API, MongoDB, Linux, React Native, Expo, Git & GitHub

EDUCATION

- M. A. H. Garhwal University, UK
Bachelor of Computer Application | Jun 2020 - Dec 2023 | Rewari, HR
Marks: 65.5%

PERSONAL PROJECTS

- InsecView
Tech Stack: Next.js (Frontend & Backend)
Description: Developed a web application for anonymous Instagram profile viewing, featuring seamless navigation and dynamic data rendering. Focused on user privacy and ensuring fast, responsive performance with a clean and intuitive UI.
- Video Player App
Tech Stack: React Native (Expo)
Description: Built an Android application for playing locally stored videos, featuring folder-based organization for easier browsing. Optimized for smooth performance and user-friendly interaction.
- Shopease
Tech Stack: React.js, Razorpay API
Description: Designed and developed an e-commerce web application allowing users to browse and purchase products with secure payment integration using Razorpay API. Features include product filtering, cart management, and a responsive design for an intuitive shopping experience.
- Gaao
Tech Stack: React Native (Expo), Node.js, MongoDB
Description: Built a feature-rich karaoke mobile application enabling users to record, preview, and save vocals synced with background music. Integrated advanced audio processing and effects such as reverb and equalizer. Developed a scalable backend using Node.js and MongoDB for storing user recordings and playlists.
- Chat App API (Chatrr)
Tech Stack: Node.js, Express.js, MongoDB, Socket.IO, JWT & Bcrypt.js
Description: Designed and developed a highly scalable RESTful API service with 10+ endpoints for a WhatsApp-like chat application. Features include user authentication, rate-limiting for security, and messaging, media sharing, and stories functionality for enhanced user experience.
- Chat App (Chatrr) for Android & iOS
Tech Stack: React Native Expo & Axios
Description: Created a user-friendly mobile app with 10+ screens, enabling seamless messaging and sharing of media files (photos, videos, audios, and documents) along with stories among registered users.

ACHIEVEMENTS

- Cleared the highly competitive Relevel full stack development test, outperforming a 33% pass rate by showcasing mastery across the MERN stack and algorithmic problem-solving.
- Solved 150+ Data Structures and Algorithms problems on CodeChef, highlighting adept problem-solving skills.
